AWS Landing Page

<https://final-project-aws-bucket.s3.amazonaws.com/index.html>

Corporate Username: c0rp0rate

Corporate Password: c0rp0rate@@

Manager Credentials: Given while creating a store
(or)

For testing, can use

Manager Username: S

Manager Password: S@@

JSON Format for Process Shipment:

```
{"shipment" : [{"sku":"sku-1", "quantity":"10"}, {"sku":"sku-2", "quantity":"15"}]}
```

Note:

There is no option to enter the customer coordinates manually. Instead, the coordinates are taken from the customers' browser automatically (need to enable the browser to access the location).

README:

The provided takes us to the initial landing page where we have option to choose either of the three users (Corporate, Manager, Customer). For Corporate and Manager we need to have authentication, where for Customer, nothing is needed.

After choosing the user, all the options associated with that particular user are shown. We need select the option which ever we need to perform.
